Enhancing Health Care Professional Wellbeing and Engagement
Promoting a Healthy and Well Organization

Promoting the “R” in RVU-Relationship Valued Unit

An EHS and UTCOMC Partnership
Bringing Back the Joy in Medicine

• Joy is found in rich, rewarding relationships with our patients, our colleagues, and other members of the health care team.

• The reciprocal interplay of
  - practice efficiency
  - a culture of wellness
  - personal resilience

influences the achievement of the Quadruple Aim
Why do we need Healthcare Provider Wellbeing Programs?

- Quality Imperative
- Financial Imperative
- Regulatory Imperative
- Educational Imperative
- Moral Imperative
400 physicians die by suicide each year, a rate more than 2X that of the general population. (Andrew & Brenner, 2015)

24% of ICU nurses tested positive for symptoms of post-traumatic stress disorder. (Mealer et al., 2007)

Physician rates of depression remain alarmingly high at 39%. (Shanafelt, 2015)

23–31% Prevalence of emotional exhaustion among primary care nurses. (Gomez-Urquiza et al., 2016)

How can we protect the health of the people who protect our own?

Reciprocal Domains of Physician Wellbeing

1. Efficiency of Practice
   
   Efficiency of Practice = \frac{\text{value added clinical work accomplished}}{\text{time and energy spent}}

2. Culture of Wellbeing
   
   set of normative values, attitudes, and behaviors that promote self-care, personal and professional growth, and compassion for colleagues, patients, and self

3. Personal Resilience
   
   the set of individual skills, behaviors, and attitudes that contribute to personal physical, emotional, and social well-being — including the prevention of burnout.
Personal Resilience

- Low Self-Compassion
- Sleep Related Impairment
- Meaningfulness of clinical care
Personal Resilience
After all, the secret for caring for others is to also care for ourselves!

- The great stories in health care are about patient/physician relationships.
- The current healthcare environment is one of unprecedented change and challenges.
- Success is defined and measured by quantitative metrics in today’s fiercely competitive quest for a coveted position on the “A” list of healthcare organizations.
- How can a quantitative statistic be measured and celebrated over human connection?
- **We must retrain our focus to celebrate the “who” along with the “what” in reports of improved patient care and population health**
Culture of Wellness

Leadership Support Crucial
To what extent do you agree or disagree with each of the following statements about your immediate supervisor?

- Holds career development conversations with me
- Empowers me to do my job
- Encourages employees to suggest ideas for improvement
- Treats me with respect and dignity
- Provides helpful feedback and coaching on my performance
- Recognizes me for a job well done
- Keeps me informed about changes taking place at Mayo Clinic
- Encourages me to develop my talents and skills
- Overall, how satisfied are you with your immediate supervisor?

- Response options: 5=strongly agree, 4= agree, 3=neither agree or disagree, 2=disagree, 1=strongly disagree: NA = don’t know/not applicable
Efficiency of Practice

- Workplace systems, processes, and practices that promote safety, quality, effectiveness, positive patient and colleague interactions, and work-life balance
Our 2016-2018 Data
Exhaustion scores significantly increased from 2016 to 2018 (0.29; 95%CI = 0.21 to 0.37; P<0.0001)
The difference in Disengagement domain between 2016 and 2018 was significant (0.23; 95%CI = 0.14 to 0.32; P<0.0001)
Job Satisfaction 2016 vs. 2018

Job Satisfaction in 2016

- Very Dissatisfied: 2.7
- Dissatisfied: 8
- Neutral: 11
- Satisfied: 53
- Very Satisfied: 26

Job Satisfaction in 2018

- Very Dissatisfied: 2.3
- Dissatisfied: 9.1
- Neutral: 12
- Satisfied: 56
- Very Satisfied: 21
Operating Principles
Keep it Simple

- Collaborate
- Collect data
- Consider needs and membership:
- Communicate and follow through
- Cooperate
- Coach
- Compute
- Celebrate
• “Here is Edward Bear coming downstairs now, bump, bump, bump on the back of his head, behind Christopher Robin. It is, as far as he know, the only way of coming downstairs, but sometimes he feels that there really is another way, if only he could stop bumping for a moment and think of it”.
Keep it Simple....

• People sit in an office full of coworkers, even in open-plan workspaces, but everyone is staring at a computer or attending task-oriented meetings where opportunities to connect on a human level are scarce.

• Happy hours, coffee breaks, and team-building exercises are designed to build connections between colleagues, but do they really help people develop deep relationships?

• On average, we spend more waking hours with our coworkers than we do with our families. But do they know what we really care about? Do they understand our values? Do they share in our triumphs and pains?
Promote Professional Fulfillment, Address Stress And Promote Wellbeing
