Military Emergency Medicine (EM) Residency Guide: Demystifying the Military Match and Application Process

Linda Katirji MD, Sameer Desai MD, Emily Hillman MD, Lucienne Lufty-Clayton MD, Gillian Schmitz MD

THE MILITARY BOUND MEDICAL STUDENT
The military match process for Emergency Medicine (EM) can be confusing and challenging to navigate. One can easily get lost in the maze of military jargon and service specific information. The military match impacts 1) students who join the Health Professional Scholarship Program (HPSP) or Health Services Collegiate Program (HSCP for Navy only), 2) students who attended a military service academy for undergraduate training and attend a private medical school and 3) students who attend the Uniformed Services University of the Health Sciences (USUHS). The purpose of this document is to serve as an overview of the military match process for both students and their advisors.

GENERAL OVERVIEW OF THE MILITARY SYSTEM
MSI and MSII years should be used to focus on doing well in classes, Step I and Step II. Basic officer training for HPSP students will be completed between first and second year.

The military application timeline is much EARLIER than civilian so it is important to be aware of the timeline early in medical school. Many students start in January of their third year setting up rotations at the military sites. The deadline for the initial application is usually in the second week of September and all final supporting documents are required no later than October 15. All applications are submitted through The Directorate of Medical Education Website known as “MODS” http://www.mods.army.mil/MedicalEducation/

Interviews are completed by November. It is the job of the Joint Service GME Selection board to rank and “match” everyone. They meet in late November / early December. The military match day is in December.

If you have a military obligation, you must apply to the military GME and the civilian match (ERAS). When you do this, there can be three different outcomes:

a) A military residency is obtained
b) A civilian residency is obtained, with military deferment (generally only in the Air Force)
c) A military transitional internship is obtained

If you are selected for a military residency, you will serve as an active-duty physician. Time in residency does not count towards any service commitment.
THE MILITARY SELECTION PROCESS
Every military student MUST go through the formal military selection process. All medical students with a military obligation will be selected for training by their military service’s Program Directors (PDs), even if the student wants to go deferred to a civilian residency.

WARNING: It doesn’t matter what your medical school or civilian residency programs tell you. You could be the most competitive applicant and they could even unofficially offer you a spot to train. HOWEVER, if you do not speak with the PDs of the military residencies you will not be selected to train in Emergency Medicine anywhere. This includes all civilian deferments if they are offered by your branch of services. Every year, this step is missed by a few very good students who are disappointed when they do not get their choice of residency.

CIVILIAN DEFERRED SLOTS
Each year the services look at their manpower needs and then set the number of EM physicians that need to be trained. This usually remains fairly constant in the Army and the Navy, but the Air Force has been known to swing widely over the years. For example, in the Air Force, there are 20 military slots with some civilian deferred slots available. These civilian deferment slots can swing from zero to over 20 in a single year. Every year a few very good students get civilian slots by letting the PDs know their intentions up front. (Honesty is key, do not try and play the game of telling everyone that they are your number one selection. It will be found out very quickly.) In general, there are rarely civilian deferments for Emergency Medicine in the Army and Navy.

SCHEDULING INTERVIEWS
Since some military applicants will obtain military deferment and train in a civilian residency, it is important that those students also apply through the civilian match and schedule an adequate number of interviews. All residencies are aware of this issue, and understand that you will be withdrawn off their list if you match in the military.

In a perfect world, you could do civilian interviews all after military match is completed, however it could be very difficult to schedule enough interviews in that short of a time. One option is to arrange for lighter month in January and backload your civilian interviews for that time period. If you do train in a civilian residency, you will fulfill your military obligation after residency.

The interview at a military residency does not have to be face to face -- phone or Skype® are acceptable alternatives in many cases. The interview also does not mean that you must place the military residencies first on your preference ranking.
WHERE ARE THE MILITARY RESIDENCY PROGRAMS LOCATED?

Army
Augusta University Medical Center (GA)
Fort Hood – Darnall (TX)
Fort Lewis – Madigan (WA)
Fort Sam Houston – SAMMC (TX)

Navy
Navy Medical Center Portsmouth (VA)
Balboa (San Diego)

Air Force
Fort Sam Houston – SAMMC (TX)
Nellis Air Force base (Civilian led) (NV)
Travis Air Force base (Civilian led) (CA)
Wright Patterson Air Force base (Civilian led) (OH)

THE POINT SYSTEM
The military uses a structured point system to rank all applicants, but the process is different for each branch of the service. When the Joint Service GME Selection board meets, each applicant is evaluated and given a point score based on success in medical school (class rank and USMLE / COMLEX scores), suitability (based on clerkships, interviews, LORs), research (more points for peer reviewed and multiple publications), and prior military service. Every military applicant will be put in an order based on their points. Based on the needs of each service, which may change drastically every year, a cut off line is set.

SUCCESS IN THE MILITARY MATCH
The Emergency Medicine military match is becoming more competitive. Success in the military match is largely based on the same things as the civilian match: course and clerkship performance, class rank, standardized testing scores, letters of recommendation, and contributing to research and extracurricular activities. Although the point system is in place, there are subjective components such as interviews and “suitability”.

Much like the civilian match, if there is a particular place you hope to do your residency, you should try and schedule a 4th year clerkship there. All HPSP students should perform a rotation at a military hospital. This gives the staff a chance to get to know the potential applicants. Knowledge and interest in the military and the customs and courtesies associated with it can go a long way. Letters of recommendation and support from military physicians may carry more “weight” than civilian.

WHAT IF I DON’T MATCH?
Unfortunately due the way the match is set up, this can be a reality for some people. However, if you do not match into a military OR civilian spot, there are still options.

a) Switch into a military residency in another field, if available
b) Do a one year civilian or military internship (transitional PGY-1 year)

Afterwards, you may do one of the following:

a) Reapply to for residency (with the opportunity to obtain more points)

b) Serve as a General Medical Officer (GMO): GMOs (Flight Surgeons and Undersea Medical Officers) provide care to active-duty personnel and gain military-specific medical training. Time as a GMO fulfills active-duty service obligation and may make your application more competitive when you reapply to the residency of your choice.

**BOTTOM LINE**

The military match is a difficult system to navigate and many aspects of it can change from year to year and is different for each branch of the military, it is very important to find a mentor in your own who is knowledgeable about the process to help guide you. The following is a list of a few key points:

1. Focus on success during medical school following the same principles outlined in the CORD Student Advising Task Force (SATF) EM Applicant’s Frequently Asked Questions and EM Applying Guide.

2. Start preparing early: find a mentor who is knowledgeable about the military match process to guide you. Consider reaching out to the military training programs to learn about timelines specific to their program. (Students may also sign up for a military resident mentor through EMRA. Mentorship application and information is available at https://www.emra.org/students/mentorship)

3. Strongly consider an EM rotation at a military hospital in addition to a civilian program.

4. It is imperative that you go through the military match and interview at the programs even if your goal is to match at a non-military program. If you do not interview with the military you will not be eligible for the civilian match.

5. Plan for civilian interviews and, when possible, schedule them for late December or January of your 4th year.
